DEFINITIONS
<p>Compliant - food business is operating in accordance with its food safety management systems, food safety standards and has met the requirements of the regulations.</p>
<p>Minor – legislative breach unlikely to compromise public health (including food safety) or animal health or welfare or lead to the handling of unsafe or unsuitable food. A minor non-compliance is an isolated low risk situation and does not compromise achieving control measures of the food safety program i.e. overall the food safety program is still effective in controlling the food safety hazards.</p>
<p>Major - legislative breach likely to compromise public health (including food safety) or animal health or welfare or may lead to the production and handling of unsafe or unsuitable food if no remedial action is taken . In addition, the accumulation of minor issues observed during the visit and or recorded in the intervention log that require an escalation on the enforcement module due to a systemic failure would also merit a major non-compliance.</p>
<p>Critical - legislative breach that poses an imminent and serious risk to public health (including food safety) or animal health or welfare. In addition, when viewed collectively a number of related major non-compliances observed during the visit and or recorded in the enforcement module as a systemic failure may represent critical non-compliance.</p>
